WARDRIGHT LLC

SOFTWARE / DATA / AUTOMATION

CAPABILITY STATEMENT

A privately held, family-owned technology company specializing in software, data systems, automation, and operational tooling.

CORE CAPABILITIES

Software engineering
Desktop and web applications, operational dashboards, and functional prototypes

Data & geospatial systems
Data processing, visualization, and spatial workflows

Workflow automation
Document processing and repeatable operational tasks

API & integration architecture
REST interfaces and system interoperability

Local-first tooling
Locally operated utilities with controlled dependencies

TECHNICAL DIFFERENTIATORS

Requirements-led engineering
Aligns implementation with defined workflows, constraints, and acceptance criteria

Maintainable architecture
Documented interfaces support maintenance and future modification

Dependency control
Helps manage integration, licensing, and maintenance risks

Documented handoff
Supports customer operation and transition through practical documentation

---

PARTNERSHIPS & ENGAGEMENT

Wardright LLC supports commercial projects, subcontracting, teaming arrangements, and specialized technical work packages. Federal opportunities are evaluated against applicable registration, solicitation, and performance requirements.

COMPANY & CONTRACTING

Legal entity: Wardright LLC

UEI: W79WEKYGRLN1

Primary NAICS: 541511

Additional NAICS: 541512

Operations: Oklahoma, USA

SELECTED ENGINEERING WORK

Identity & secure operations
Engineered identity, authorization, brokered access, and evidence-oriented operations for a controlled software environment.

Contracting workflow architecture
Developed structured data-processing and workflow components with controlled access and traceable operations. Integration qualification remains in progress.

Technologies & Environments

- Python
- JavaScript / TypeScript
- React / Next.js
- C# / .NET
- Node.js
- SQL / PostgreSQL / SQLite
- PowerShell
- AWS
- Docker

Bring Us the Requirement.
We'll Bring You the Results.
